WHAT I DO WELL

UI Design

I have spent the last 10 years designing user interfaces. My current work focuses on designing user-friendly and impactful healthcare prototypes and web apps.

Development

My second love is frontend development, with the last 5 years using ReactJS, and more recently Next.js and Material UI. I love to create designs and then see them come to life.

Data Visualization

I am exceptionally adept at taking complex data and ideas, distilling them into digestable and coherent pieces, and transforming them into visualized data.

MY DESIGN PRINCIPLES

Clear

A simple, crisp, intuitive design is a result of good structure and proper spacing.

Consistent

A consistent layout, language, and design helps improve user engagement and experience.

Delightful

Enrich the user experience by using new technologies, behavioral design, gamification, and creativity.

MY CODING PRINCIPLES

Modular

Create a function once, use it twice! Keep code DRY and easy to reason about.

Style

Use best-practice naming, punctuation, spacing, and comment conventions to keep code clean and readable.

ABL

Always Be Learning! Keep up with the latest updates and changes. Smart people make smart libraries smarter.

MY EXPERIENCE

2013-present
The MITRE Corporation
UI Designer & Developer, Senior

- Lead Designer for high-impact MITRE Moonshot research project, solely responsible for creating a cohesive design strategy across multiple projects, including presenting innovative work to sponsor workgroups and national conferences, and leading patient and clinician UX focus groups.
- Design Implementation Lead on Clinical Decision Support project, designing and implementing improvements, and spearheading and implementing a codebase-wide refactor to improve maintainability.
- Mentoring and providing technical leadership to project teams by pushing for clean, concise, and standardized code.
- Creating wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas.
- Bringing mock-ups to life using HTML, CSS, JavaScript, ReactJS, Next.js, and Material UI.

2012-2013
Brandeis University
Web Developer

- Developed sites for various divisions of the University and assisted with administration of the Cascade Server web content management system and myBrandeis campus portal.

2012-2012
NASA-JPL
Research Intern

- Developed a Matlab program which converted spherical harmonic coefficients from the Magellan orbiter into topography, measured gravity, geoid, and gravity maps for studying volcanoes on Venus.

2008-2012
Wellesley College
Office Assistant

- Developed a Matlab program which converted spherical harmonic coefficients from the Magellan orbiter into topography, measured gravity, geoid, and gravity maps for studying volcanoes on Venus.

MY EDUCATION

2013-2014
Brandeis University
MA, Computer Science

- GPA: 3.9

2008-2012
Wellesley College
BA, Geosciences

- GPA: 3.7
- Magna Cum Laude
- Focus in Computer Science
